Challenge # 11 – ‘No Instructions!’

Finding solutions!

Have a go at making something without instructions, using anything around your house. This example is for building miniature dens (you could also make life size dens too – see Family Learning Challenge # 2!) You don't have to make a den that lasts forever, you could take it down when you've finished playing with it.

Set yourself a challenge like: It has to have a door, it has to be able to stand up and it has to have a roof. Or come up with your own building specifications!

You could have a go at making all sorts of things without instructions – a paper windmill, a hat, a boat made out of paper (does it float?!) The list is endless!

When you have completed your challenge please login to the Survey Monkey to let us know how you got on. You can download photos too.
